

Next Generation IP Surveillance Systems Built to Move

DNF Security's JetX Portable series offers the first mobile surveillance solution for on-the-go, mission critical deployments. Whether you are monitoring a small office, construction site, or crowded concert, the rugged all-in-one design is ideal for demanding surveillance applications. Its compact size makes it easy to transport and setup at a temporary or remote location. Simply power-up, connect your cameras, and use your favorite video management software for a complete portable surveillance solution.

JetX Portable series supports hybrid and analog surveillance, allowing up to 32 analog and 8 IP channels. The JetX xDisplay edition is available in single or triple display versions, with up to 3TB of storage. The JetX M-Powered edition features battery-powered capabilities, ideal for locations without a power source.
